

# BOIL-TAB

2399V1-090

## Boiler Water Treatment Closed System Cleaner/Passivator

Blended, Solid Concentrate BOIL-TABS are used for pretreatment of new or re-piped boilers. The product contains caustic, soda ash, borax and phosphate. Tablets are designed to eliminate spillage of liquid chemicals during addition and control noxious dusting when adding powder inhibitors.

**Application/Feed-rate:** This product should be fed at the rate of 5 tablets per 50 gallons of water volume. Product contains alkaline materials. Follow manufacturer suggested cleanout/boil-out procedure. Attention should be paid to metallurgy of the system as pH may increase with application of this product. Care should be taken to avoid contact with copper or aluminum at high pH levels. NOTE: This product may cause foaming when fed at high levels.

**Function:** This proprietary product was designed to passivate and remove deposits of mill scale, oil and grease, or other fouling materials prior to placing the system into normal operating conditions.

**Feeding:** Remove tablet from shipping container and introduce into shot feeder or open tank. Dissolving rates will vary depending upon water composition, temperature, and flow rate. Cold water will slow product dissolving rates. In water less than 50°F, the BOIL-TAB products should be fed to closed system via side stream filter with appropriate filter media in place.

**Tablet Size:** 2.5 inch diameter, 3/4 inch depth

**Packaging:** Each container is a pail of 100 Tablets inner wrapped with protective plastic and desiccant pack included to reduce moisture. Pails weigh 20 lbs. net, each pail containing 100 x 0.2 lb. tablets.

*For optimal performance, store in temperature-controlled environment at less than 85° F. Follow [Safety Data Sheet \(SDS\)](#) regarding proper storage and handling.*
