

# Ultra-M

Our most versatile dissolver ever.

## Unmatched flexibility and reliability

The Ultra-M is the flagship model of the enduroTEQ™ series. It utilizes a non-electric mechanical level system and integrated flow control to provide accurate chemical dosing for a variety of water treatment systems.

Built with durable HDPE injection molded body components and high quality chemical resistant materials, you can be confident in its performance regardless of environment or chemical choice.

The sleek, compact design allows for installation in tight spaces. The Ultra-M is capable of treating systems both large and small. Designed to couple easily, this system can be expanded to treat even the largest boiler and cooling systems.

Installations are a breeze. The unit can be installed in as little as 10 minutes. A chemical pump is required. Please refer to our *chemical pump selection guide* when choosing the correct pump for your installation.

## SYSTEM SPECIFICATIONS

<b>Net weight</b>	9.6 lb	<b>Flow rate</b>	0.45 GPM
<b>Ship weight</b>	13.0 lb	<b>Spray nozzle</b>	Form Specific
<b>Dimensions</b>	10" W x 23" H x 13.5" D	<b>Mounting</b>	3 screws and anchors
<b>Minimum water line requirement</b>	3/8"	<b>Assembly &amp; install time</b>	10 minutes
<b>Water pressure</b>	20 psi - factory set	<b>Electrical requirements</b>	N/A

## PRODUCT FEATURES

- Easy to install
- Non-electric level control
- Small footprint
- Can be coupled for use with large systems
- HDPE injection molded body components
- Compatible with bottles
- Compatible with discs
- Designed for chemical resistance
