

Operations Tech Job Post

AP Tech is a dynamic, growing business serving over 200 water treatment partners who supply AP Tech's solid chemistry water treatment programs to over 10,000 customers in North America, Central America, South America, United Kingdom, Europe, Australia, New Zealand, Korea, Malaysia, and Thailand.

As the global leader of solid chemistry technology and equipment for water treatment, AP Tech is committed to manufacturing exceptional products. We're excited to add an **Operations Tech** position to our operations team to support production and manufacturing with continued increased demand for our products.

Key accountabilities of the Operations Tech:

- Follow and complete job assignments supporting AP Tech's production and workflow as assigned by Supervisor or Operations leadership. This position is a fulltime, 8-hour shift. Depending on business conditions overtime may be offered and sometimes mandatory.

Job assignments could include:

- Chemical blending and manufacturing
- Order picking and packing
- Loading/Unloading trucks and moving raw materials and finished goods throughout the facility with the use of a forklift and/or pallet jack
- Assembly of equipment products
- Participate in general housekeeping of plant and work areas

Other expectations:

- Meet productivity and quality goals
- Maintain an organized and clean work area
- Attention to detail

Requirements:

- High School diploma or equivalent
- Chemical manufacturing or warehouse experience helpful but not required
- Forklift experience preferred, but not required
- Good math, reading, communication and organizational skills
- Ability to multi-task and be a quick learner
- Strong work ethic
- Reliable
- Team player
- Must be able to pass a drug screen and background check
